Joao

- 3 MIK SM 57 (Drums)

-3 Mik Stands

Baptiste

- 1 DI (Bass)
- +48V

Informations for technicians and hosts

Sound

- Le chat qui danse plays with amplification to balance the different volume of the instruments.
- The General Sound should be groovig, but not too loud
- Daniel changes often and quickly the instruments (also during the song), while sounds and volume can change essentially
- Luigi changes from guitar to accordion (and viceversa), sometimes also during the song

PA Equipment

- The equipment for events in big halls, open Air and festival must be organized by the host. A technician must be present till the end of the concert.
- For privat events can we bring our PA equipment

Other Informations

- We need a nearby room, in which we can tune our instruments, keep the instrument cases and to change the clothes
- In open-air concerts, we need, regardless of the weather conditions, a fully covered stage
- Minimal stage dimension 5x3 Mt
